SUMMARY

Senior full-stack software engineer with 8+ years of experience building web, mobile and video-streaming products, specialising in React, Next.js, TypeScript, GraphQL, Node.js and Flutter. Built the vix.com streaming platform from the ground up, an AI-powered video editor, a fintech mobile app and a cross-platform Outlook plugin. Holds a Master's in Multimedia Networking (Université Paris-Saclay) with deep grounding in adaptive streaming, video codecs, CDNs and DRM. Clean-architecture practitioner accustomed to Agile delivery and fully tested codebases.

PROFESSIONAL EXPERIENCE

BairesDev

São Paulo, Brazil (Remote)

Senior Software Engineer

Jan 2024 – Sep 2026

- Designed and built a full-stack, web-based Outlook add-in for Veritext in a two-engineer team, owning architecture, implementation, documentation and production support.
- Delivered calendar manipulation, event data synchronisation, authentication, tenant management, form submission and database management features across web, Windows and macOS Outlook runtimes.
- Implemented the front end in React/Next.js with shadcn/ui, Tailwind CSS and Zustand; the back end in Node.js/TypeScript with GraphQL, Drizzle ORM and SQLite.
- Integrated Microsoft Graph, Office JS and multiple client REST/GraphQL services, handling cross-browser and cross-runtime compatibility.

Aeon Research (Tellers.ai)

Paris, France (Remote)

Senior Front-End Engineer — Flutter

Apr 2023 – Sep 2023

- Served as senior developer and interim front-end tech lead at an AI start-up, building a modular, clean-architecture, cross-platform (web and macOS) application in Flutter/Dart.
- Built an AI-powered video editor with drag-and-drop timeline, cropping, composition and audio tooling, plus text-prompt-driven video generation and smart editing.
- Shipped a ChatGPT-style text-generation service for journalists driven by user prompts.
- Integrated FFmpeg for media processing, Firebase Storage, AppFlowy rich-text editing, Riverpod state management, internationalisation and authentication.

VIX (TelevisaUnivision)

Remote

Full-Stack Engineer, Mid-Level — React

Jun 2021 – Apr 2023

- Helped build the vix.com streaming platform from scratch with React, TypeScript, Next.js, GraphQL and Styled Components, following clean architecture and an Agile lifecycle.
- Member of the dedicated video sub-team owning the player package (Shaka Player and Anvato): playback controls, seek, full screen, closed captions, DRM, Chromecast, adaptive streaming, analytics and advertising.
- Maintained 100% Jest unit-test coverage and a near-complete Storybook component library.

Granito Pagamentos

São Paulo, Brazil

Mobile Developer, Mid-Level — Flutter

Dec 2019 – Jan 2021

- Built the fintech's customer mobile app from scratch in Flutter/Dart with a team of four, working alongside a design team under an Agile process; published and maintained on Google Play.
- Implemented login, transaction summary, transaction split, transfer, receipt request and tap-on-phone (phone-as-card) payments.
- Owned app design, local database handling, REST API consumption, analytics event generation and MobX state management.

IBM Brazil

São Paulo, Brazil

Data Engineer

Jun 2018 – Nov 2019

- Worked on the ETL back end for TIM, one of Brazil's largest telecom operators, transforming raw point-of-sale data into the information used to pay third-party commissions.
- Handled validation and backup of remote in-server files, wrote advanced SQL queries and Bash scripts, and designed IBM DataStage jobs implementing the business rules.

ATEME

R&D Intern — 360° Video Transport

Paris, France

2017 (6 months)

- Proposed a solution to the high-bandwidth requirements of 360° video: studied AVC/HEVC encoding with FFmpeg, evaluated projection/mapping strategies and implemented MPEG-DASH with the SRD extension.
- Integrated the work into ATEME's codec pipeline using shell scripting, SVN and Jenkins.

EDUCATION

Université Paris-Saclay

Paris, France

Master of Science in Multimedia Networking

2015 – 2017

- Coursework: CDN architecture and caching, adaptive streaming (DASH, HLS, ABR), audio/video transport, data compression (MPEG-x, H.26x), DRM, cryptography, information theory.

Télécom ParisTech

Paris, France

Engineering Degree (Diplôme d'Ingénieur), Networks and Multimedia

2015 – 2017

- Coursework: IP and cellular networks (2G–4G), signalling and multimedia, Internet applications, telephony, digital communications, source coding, optimisation.

Universidade de São Paulo (USP)

São Paulo, Brazil

Bachelor of Engineering in Electrical and Electronics Engineering

2012 – 2018

- Coursework: digital systems, fibre optics, computer organisation, microprocessors, digital signal processing, control principles, wireless communications. Double-degree exchange with Télécom ParisTech.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Dart, SQL, Bash, C++, Java, HTML5, CSS/Sass

Front End: React, Next.js, Vite, Vue.js, Tailwind CSS, shadcn/ui, Styled Components, Storybook, Zustand, Flutter, Riverpod, MobX

Back End & Data: Node.js, Express, GraphQL, REST, Drizzle ORM, SQLite, MySQL, Firebase, AWS, ETL / IBM DataStage

Video & Streaming: Adaptive streaming (DASH, HLS, ABR), Shaka Player, video.js, dash.js, FFmpeg, AVC/HEVC, DRM (Widevine), CDNs, QoE metrics and player observability

AI: LLM-driven features, AI agents, Model Context Protocol (MCP), tool use

Practices & Tools: Clean architecture, Agile/Scrum (Jira), Jest unit testing, Git/GitHub, Linux, Jenkins, Webpack, Figma, Microsoft Graph / Office JS

LANGUAGES

Portuguese — Native (ILR 5) • **English** — Full professional proficiency (ILR 4) • **French** — Professional working proficiency (ILR 3)

SIDE PROJECTS

WhatsApp Chatter (Atomation)

Personal project

Full-stack AI messaging and scheduling

- Built an LLM-powered WhatsApp assistant with a responsive React/TypeScript inbox, Node.js/Express APIs, Twilio webhooks and PostgreSQL persistence with Drizzle ORM.
- Implemented configurable assistant tools, per-account Twilio settings, live inbox updates and Google Calendar scheduling with availability and working-hours rules.

Leruna (speed-chat)

Personal project

AI voice reading for iOS

- Built a native iOS app for interactive spoken story reading using real-time AI audio with Gemini Live/OpenAI Realtime and a Convex backend.
- Integrated Clerk authentication, imported text and a classics catalog, synced reading progress, story-context questions and model-provider fallbacks.
